

The Entertainer

7.1 Surround Sound
Theatre

The Entertainer combines European design, Advanced YSTII™ subwoofer muscle, and innovative 'Scene' and 'YPAO' technologies that make setup and operation a breeze. Yamaha's NS-7900 speakers rich, clear sound offer a very convenient way to enjoy a thrilling sound experience. The innovative RXV661 is a 7.1-channel home theatre receiver with an amazing array of features including Yamaha's new SCENE, 1080p-compatible HDMI, improved YPAO sound optimisation and iPod compatibility. Considerable low-frequency energy is handled by a dedicated high power and low distortion subwoofer. A true sub-woofer, it ensures that you are not missing anything, and it also makes the overall sound richer and properly balanced.

The Entertainer all makes sense when you start playing music or movies.

But **The Entertainer** is much more than a thrilling home theatre. With '2-zone' capability, the RXV661 allows 2 different source components to be played in 2 separate areas at the same time. Brand new release YMA05250S speakers are ergonomically designed to blend with any décor and can even be used outdoors. It's just like having 2 high quality audio systems in one!

Entertainment for
your whole home...

Unleash entertainment from the confines of your living room. **The Entertainer** actually includes quality indoor/outdoor speakers to fill a second area of your home. Imagine, thrilling home theatre DVD playing in one room, and calming FM radio in another—or even outdoors. The Entertainer is ready for anything.
